Marula Oil Collection

Our Story

Lief Essentials was created with the aim of developing high quality skincare products made of natural, fresh ingredients.

Their key ingredient, marula oil, comes from the heart of Africa. Each product is developed with utmost attention, ensuring that no colorants, alcohol and parabens are added.

We also care about the environment: Lief Essentials allows no animal testing and we support sustainable, fair-trade development, because we believe it is our obligation to commit to our environment and genuinely make the world a better place.

What is Marula Oil?

Traditionally used by Tsonga people in South Africa and Mozambique, marula oil comes from a fruit pit and, due to the high amounts of oleic acid, is seen as a natural skincare product. Antioxidants and essential fatty acids protect our skin from environmental aggressors that cause premature aging and ensure soothing hydration. Traditional cosmetic oils have thick texture and just stay on the top of the skin, while marula oil is quickly absorbed and nourishes multiple skin layers.
